

# 11 Month Inspections

**A house is a major investment, and it would be terrible to move into your new home and discover that there were unforeseen problems.**

While many new homes have a one-year warranty, you don't want to wait until that runs out to discover something's wrong. Get ahead of the game with an 11-month inspection from Capital City Home Inspections.

An 11-month home inspection involves a certified home inspector coming to your house just before the one-year warranty is up to give it a thorough inspection for any concerns. Capital City Home Inspections provides a careful, non-invasive inspection where we'll check on the:

- Foundation
- HVAC Systems
- Roof
- Piping
- Interior and Exterior
- Overall Structure

These findings will be compiled into an extensive report. You can then take this report to your contractors, who can address any issues found before the warranty runs out.

Getting an 11-month home inspection can save you time, money, and stress. Capital City Home Inspections is more than happy to provide this service to help give you peace of mind. **You can learn more about this service by calling (252) 544-3655 today.**
